Property Management and Rental Rates

Property Management

The Fund benefits from the local real estate expertise and market intelligence of best-in-class property managers. Alliance Residential Company, the seventh largest third-party manager in the U.S., provides property management for Spectra South. Roscoe Properties Inc., a third-party manager in the U.S. with local market expertise and experience, provides property management for The Landing at Round Rock. The Worthing Companies, a third-party manager in the U.S. provides property management for Landmark at Coventry Pointe.

Implementation of Yield Management Software

The Manager has implemented yield management software at all of its Properties. This software provides updated pricing on a daily basis, optimizing asking rents and renewal rents in real time, based on supply and demand for different apartment unit types. This rental rate optimization system is similar to those employed by the hotel and airline industries to manage their room rates and flight prices.

Ancillary Services Update

The Manager continues to maximize ancillary revenue by ensuring the ancillary rates are at market levels. Privacy yards for select suites are being installed at The Landing at Round Rock which generates approximately \$100 per month of additional ancillary income per yard. At Landmark at Coventry Pointe, the Fund has introduced reserved parking spaces which generates a rental premium of \$25 per space per month. All properties offer trash pick-up services.

Outlook

The Manager believes its portfolio will continue to see strong demand for residential rental accommodation based on the quality of its apartment communities, low unemployment rates and strong job growth. The performance of the U.S. economy and local markets continue to support improved multi-family real estate fundamentals. In addition, the Fund has initiated its value-enhancing capital expenditure program at the Properties which combined with active asset management initiatives is anticipated to drive strong occupancy, rental and net operating income growth. The Fund expects to produce consistent investment returns for unitholders while carrying out its value enhancing capital initiatives.
